Objective

Motivated and dedicated first-year college student with foundational knowledge in Java and HTML seeking to apply programming skills in an entry-level position or internship. Eager to learn and develop proficiency in software development, web design, and coding best practices.

Education

University of South Carolina - Columbia, SC
Bachelor in Computer Science   Expected Graduation: May, 2028

- Relevant Coursework: Introduction to Java Programming, HTML & Web Development, Computer Science Fundamentals.

Technical Skills

- Programming Languages: Java, HTML, CSS (basic knowledge)
- Web Development: Responsive design, basic web page structure, form handling
- Software/Tools: Visual Studio Code, Git, GitHub, Eclipse IDE
- Operating Systems: Windows, macOS, Linux (basic familiarity)
- Other Skills: Problem-solving, attention to detail, time management

Projects

- **TaskMate** - Is a simple project management tool to help individuals or small teams organize and track their tasks. The name reflects its role as a "mate" to help with task management.

- Applied basic HTML for page structure and CSS for styling, with a focus on creating a user-friendly, visually appealing layout.

Experience

- Assist students in understanding coding concepts and problem-solving strategies for Java programming assignments.
